BMJ.2014.022376.R4 - Restoring Study 329: A randomised, controlled trial of the efficacy and harms of paroxetine and imipramine in the treatment of adolescent major depression

Dear Prof. Jureidini:

I am writing to let you know that your paper is under legal review. I am afraid this is likely to result in a delay before any final determination can be made with regard to publication in the BMJ. I am sorry about the delay but I am sure you can understand the importance of this part of our process.

Very truly yours,

Elizabeth Loder
